- INFORMAZIONI SU CARTELLA COLORI PAG.4 -

- Leggeri cambiamenti nelle tonalità dei colori sono inevitabili.

Colori trasparenti:

- Le tonalità dei colori possono variare a seconda della forma e dimensione e sono dovute caratteristiche di produzione, pietre di piccole dimensioni hanno una tonalità di colore più chiaro rispetto alle pietre medio grandi.

Colori opal:

- La qualità del vetro comporta tonalità e opacità dei colori diverse all'interno della stessa confezione.

Colori #49, #50:

- Sono colori con venature naturali del vetro.

Colori Metallizzati:

- Il rivestimento di metallizzazione del colore viene applicato sul vetro sottovuoto.
- Le caratteristiche della produzione possono determinare colori con sfumature diverse.
- I colori coating contrassegnati con ° Non sono resistenti alla galvanica o a lavorazioni simili.

TALCATURA:

- La talcatura sul fondo delle pietre permette la rifrazione della luce e l'incollaggio su molte superfici.
- La tenuta del foiling alla galvanica e all'incollaggio va testata prima della messa in produzione.

SENZA TALCO:

- Su richiesta tutte le pietre STHREEM possono essere ordinate senza talco con una maggiorazione del prezzo del 20%.

- INFORMATION ON COLOR CARD PAGE 4 -

- Slight changes in color shades are inevitable.

Transparent colours:

- The shades of the colors may vary depending on the shape and size and are due to the production characteristics, small stones have a lighter shade of color than medium-large stones.

Opal colours:

- The quality of the glass leads to different shades and opacities of the colors within the same package.

Colors #49, #50:

- These are colors with natural glass grain.

Coating colors:

- The color metallization coating is applied to the glass under vacuum.
- Production characteristics can determine colors with different shades.
- The coating colors marked with ° are not resistant to galvanic or similar processes.

FOILING:

- The foiling on the bottom of the stones allows the refraction of light and bonding to many surfaces.
- The resistance of the foiling to galvanic and gluing must be tested before putting it into production.

UNFOILED:

- Upon request all STHREEM stones can be ordered without foil with a 20% price increase.
